
# Premium HDMI Cable now supports Type D-A Cable

**Sony HDMI ATC is providing Compliance Testing Service for Premium HDMI Type D-A Cable.**

**There are many Digital Camera and Mobile Display supporting HDMI micro connector. However, it seems some HDMI type-D Cable does not have good performance of 4K transmission.**

**Thus, Sony HDMI ATC standardized HDMI Premium HDMI Type D-A Cable end of this year collaborated with fixture and cable manufacturer, by verifying over 60 cables in the market and developing compliance testing method. Plus, in the process, we found useful knowledge as expert with regard to cable design for reducing EMI, optimal testing environment and etc., and we believe it will also help you.**

**We hope our service will help your success in business.**

- **Our Compliance Testing Service for Premium HDMI Cable**
  - **Premium HDMI Cable Type A to A (standard to standard type)**
  - **Premium HDMI Cable Type A to A (active type)**
  - **Premium HDMI Cable Type D to A (micro to standard type) ←NEW !**

Premium High Speed HDMI® Cable Program now supports HDMI Type-D connector

11/10/2021

The Premium High Speed HDMI Cable Program now supports the HDMI Type-D connector. This enables mobile, photography and other product categories to benefit from the performance of Premium High Speed HDMI Cables for the delivery of 4K content. The updated documents can be downloaded from the Adopter Extranet for the Premium HDMI Cable Program participants.
