Revision	Date	Description
Revision 1	December 21, 2016	First release

Index

New in Network Video Management System Standard Edition 2016 R3

Simplified Export Panel in Network Video Management System Smart Client

The Simplified Export Panel reduces exporting video to three simple steps: Select cameras, set start time and end time, click Export. The result is an export in database format, with the Network Video Management System Smart Client - Player included. If you require more advanced export capabilities, you switch to the advanced mode of the Network Video Management System Smart Client, and use the full functionality of the well-known export dialog.

The simplified export panel is available when connecting Network Video Management System Smart Client to Network Video Management System Standard product.

Changes or Issues Solved
